WEB PROGRAMMING AND APPLICATIONS

(503073)

## WEEK 4

Prepared by Mai Van Manh

Exercise 1: Use Bootstrap grid system to design the following responsive web page:

See example video (*exercise1-demo.mp4*) for better explaination.

Exercise 2: Use Bootstrap 4 to design an HTML form like the one bellow. You are allowed to use only Bootstrap 4 provided classes, please do not write any CSS code (inline, internal, external css).

Desktop version

Mobile version

When the login button is pressed, you need to use Javascript code to check the form validation result and display corresponding error messages (remember to use only Bootstrap) if the form validation result is failed.
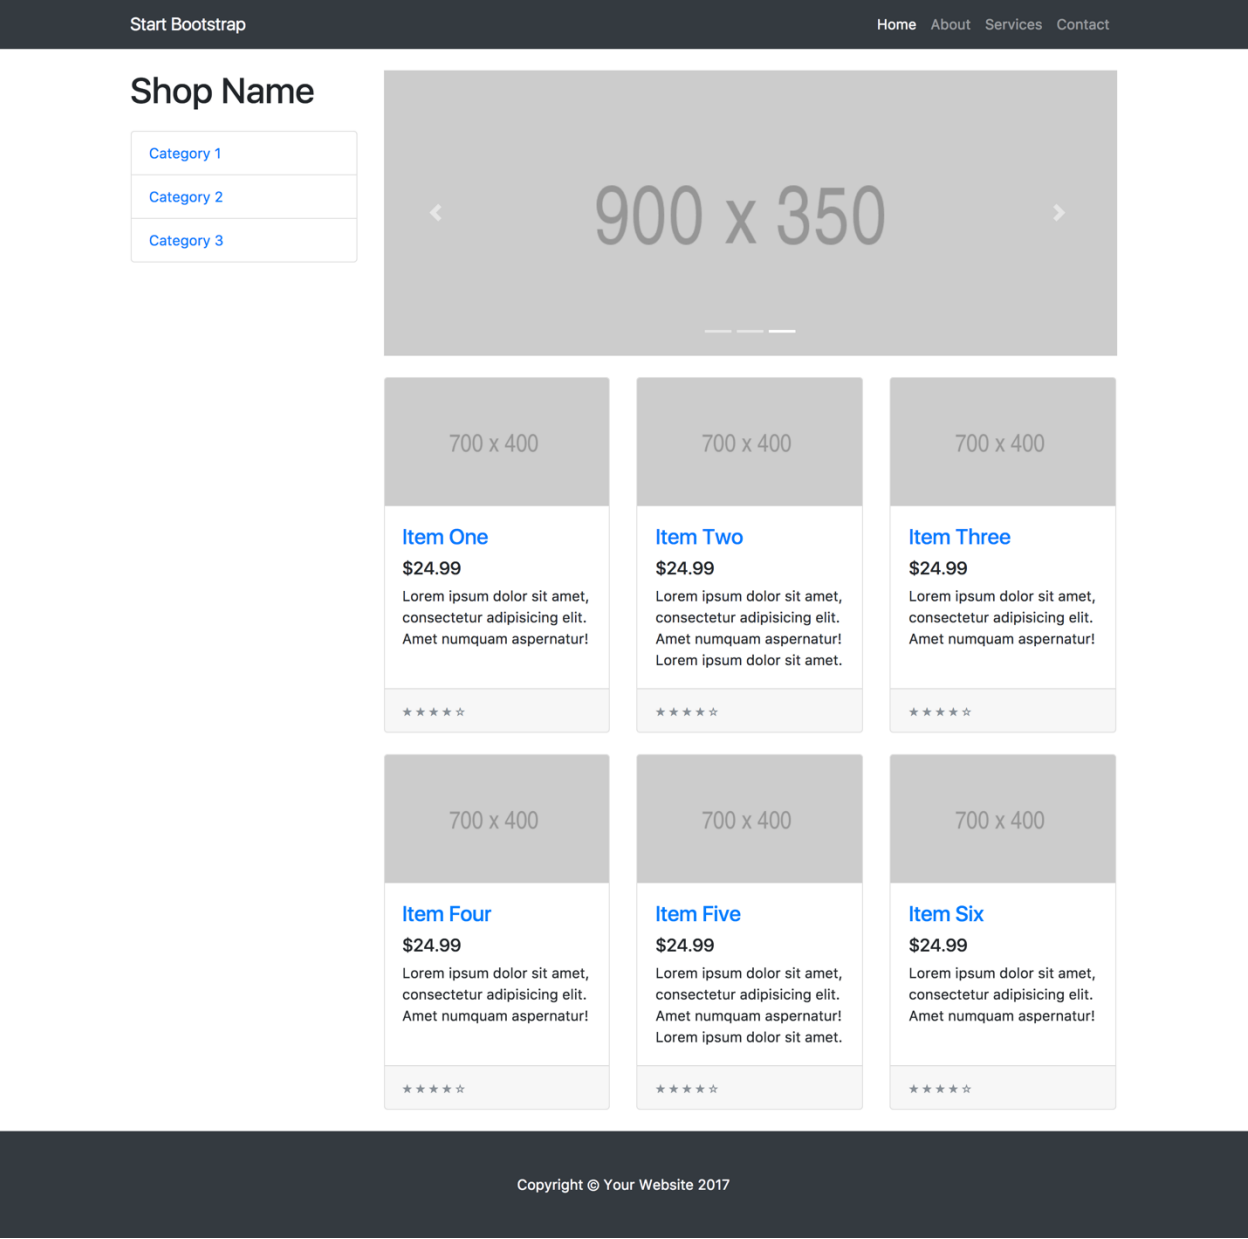

Exercise 3: Create a responsive website look like the following screenshots:
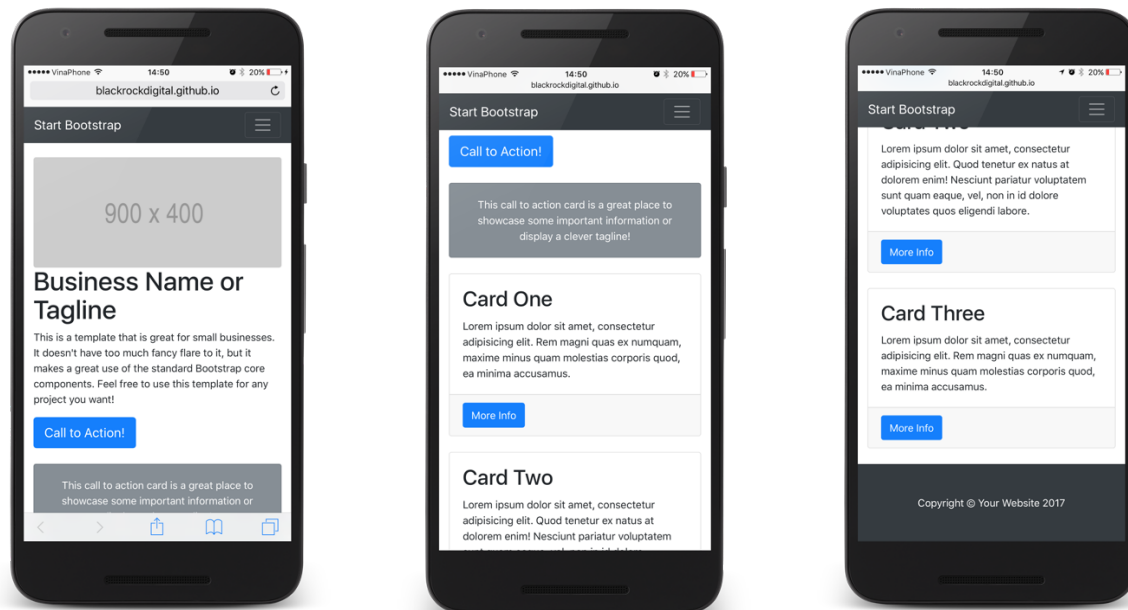

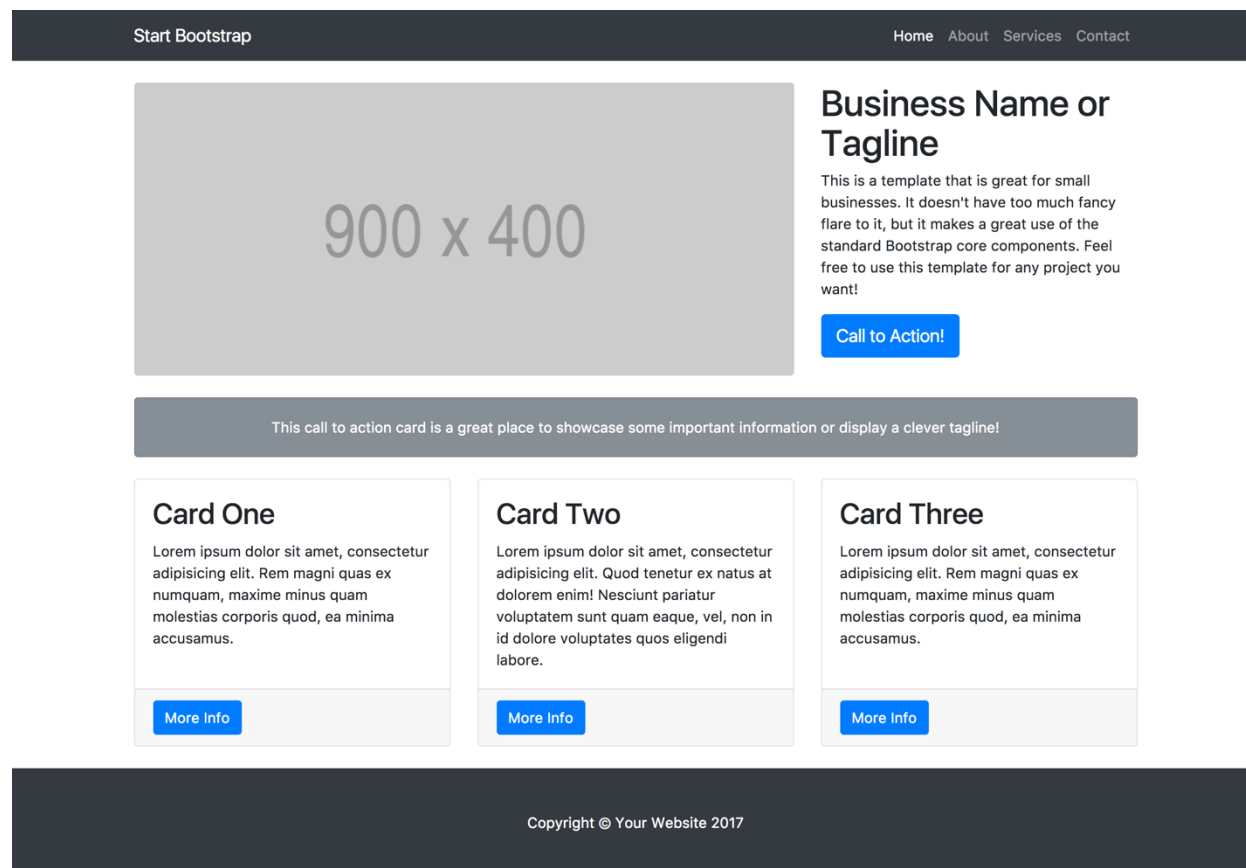

See example video (*exercise2-demo.mp4*) for better explaination.

Exercise 4: Create a responsive website look like the following screenshots:

See example video (*exercise3-demo.mp4*) for better explaination.
